Thank you Karen. Cheryl I'll defer to you whether you want to pursue either alternative Karen mentioned ... either download for free an electronic copy, or purchase a printed copy from Wisconsin Geological & Natural History Survey. Let me know if I can be of any assistance.

Milo

Good morning,

I attempted to get a copy of that map from the Library of Congress, and they just responded that they will not lend it. However, as mentioned earlier, it looks like the Wisconsin Geological & Natural History Survey has made those available for free online or you can order a print for \$10.00: <https://wgnhs.uwex.edu/pubs/000467/>
See Plate 5: Water Table Map of Marquette County (1981): <https://wgnhs.uwex.edu/pubs/mp811plate05/>

Karen

In general, yes, I am able to obtain interlibrary loans from the Library of Congress. I don't normally request maps, but I checked their interlibrary loan policies and I don't see any restrictions about lending maps. LOC has have up to 20 days to respond to the request so the process can take a while. LOC restricts use to in-library use only, so if I did get the map the requestor would have to use it in the Region 5 Library. I wouldn't be able to let it leave the library.

Also, that link you mention to establish an account to check items out is only for use *on site at the Library of Congress*: "Library of Congress registered readers (as well as LC staff and Congressional staff) may use this service to request materials for on-site use." If you're not on site, you have to go through a library to obtain the material.

Karen,

Curious, does your position as librarian mean that you have an account established for checking things out from the Library of Congress? I am not necessarily the requestor, it would be either Cheryl Burdett of Water Division, of Chuck Mikalian of Office of Regional Counsel. But I'll be meeting with them later this morning.

The document by I.D. Lippelt that includes the water table map can be obtained from the Library of Congress here (second listed document):

<https://www.loc.gov/maps/?fa=contributor%3Awisconsin+geological+and+natural+history+survey%7Csubject%3Awisconsin%7Ccontributor%3Alippelt%2C+i.+d.&all=true>

But the site requires that you establish an account to check out the document.
